## Math Skills with horses!

### A visit from the farrier

**1.** It's farrier day! 10 horses hooves need trimmed. He charges £5 to trim each hoof. How much will our bill cost? use the table to work out each stage of the process.

# horses	# hooves	Multiply by \$5 =	Total cost per horse

**2.** How much will it cost to do all 10 horses?

=£

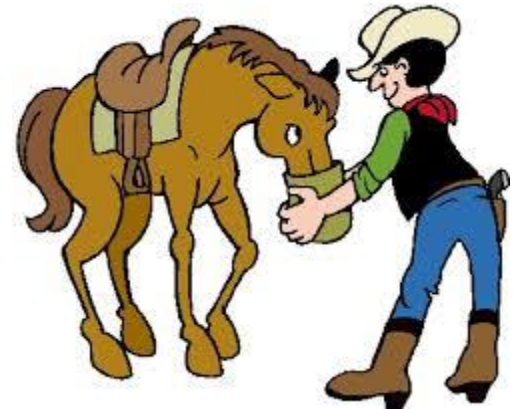

# Feeding the Horses

1. I am going to the feed store today to buy Chaff

Each horse eats 5lb of chaff per day. we have 10 horses, for 1 month (30 days) how many bags of chaff will I need? *Hint: Each bag contains 50lb.*

# horses	lb of chaff per day	multiply by 30 =	lb of chaff per month	Divide by 50 =	# Bags of chaff per month

## How much HAY does a horse eat?

1. Each horse eats 10lb of hay a day.  
How much hay does 1 horse eat in a month?
2. How much hay will 10 horses eat in a month?
3. How many bales of hay should I buy, if **(a)** one square bale weighs 50 lb. **(b)** One round bale weighs 1000 pounds.

## Fill out the table

# horses	lb of hay per day	multiply by 30 =	lb of hay per month	Divide by 50 =	# Bales of hay per month
